

ConcreteGo.com, the Web-based Central Dispatch

Volume 1, Issue 1, Oct 2009

ConcreteGo.com is the first web-based dispatch in the concrete industry. Since it uses the Internet to connect batch plants and dispatch computers, you will **NOT** need to build a infrastructure for it. Implementing ConcreteGo.com becomes quick and easy. Regular computers with DSL or cable Internet access are all you need. **One flat fee** covers all central dispatch features: robust Order Entry, Flexible Ticketing, Drag & Drop Tracking & Scheduling, Detailed Reporting, Price Structures, Cost Calculation, Customer Credit Management, Project Specification, Item Inventories, Mix Design Management, 2 Way Batch Panel Communication, Dot Matrix or Laser Printing, and more. No extra charges for licenses of users and trucks. No maintenance contract. Free and instant no hassle upgrade. Call us at 203.327.3649 for a **FREE TRIAL** today!

ConcreteWorks 2009

Sysdyne will be exhibiting at the NRMCA's ConcreteWorks show in Indianapolis! It will be held from October 18th to the 20th at the Downtown Marriott! We hope to see some of you there!

Do you use QuickBooks or PeachTree Accounting?

Did you know that Sysdyne's batching and dispatching products easily interface with these popular accounting programs? Our program, called Quick Link, makes it easy to transfer pricing, weights, and other pertinent ticket information to your favorite accounting program. It eliminates having to reenter data when it is time to bill your customer! We can also build a custom interface if you use a different program. Call us for more information, including pricing.

We'll also be at the 2010 WOC show! Visit us in booth

N1121.

February 2 to 5, 2010

Introducing: Don Flatt

Please join us in welcoming Don Flatt, our new Sales Specialist, to the Sysdyne team! Don has years of experience in the concrete industry and is an expert of concrete dispatching. He would be glad to answer any questions you may have! Contact him at extension 118.

World of Concrete 2010 is a few short months away!

World of Concrete takes place in "Fabulous" Las Vegas, Nevada every winter.

WOC 2009 has been one of our most successful shows to date and we are definitely looking forward to next year.

Sysdyne has booked a larger booth for this upcoming show. At 400 square feet, it is one of the largest booths we have ever had. We will be located in the North Hall Producer Center this year, in between the two main entrances. We will have a sign hung from the ceiling, so it will definitely be easy to find us!

We will have our sales and technical representatives available should you have any questions about our products. Don't forget to come visit us in **N1121!**

Reminder! Version 1.31.147 of the Sysdyne Batching Software is available for download on our [website](#). Be sure to take a look at the latest release notes for details on bug fixes and new features! If you need assistance (and subscribe to our Online Support service), click the Online Support button in your existing batch program.

To remove your company from our mailing list (now, why would you want to do that?), [click here](#).
